	Trenbolone acetate	200					

The color coding system[®] was designed to help you:

- Understand and differentiate the products and ingredients.
- Reduce product selection errors within your implant inventory.

TBA	Trenbolone acetate
EST	Estradiol

Delivery devices:

- Refer to the device column on this chart or to the implanter box to ensure that you select the correct device.
- Please check implanter box for instructions on the use and cleaning of the appropriate delivery device.

Please note all implants containing trenbolone acetate require refrigeration.

Administer one dose in the ear subcutaneously according to label directions.

The label contains complete use information, including cautions and warnings. Always read, understand and follow label and use directions.
