

Bovine Rhinotracheitis Vaccine Modified Live Virus

Elanco™

Titanium® IBR
from the *Signature* cell line®
IBR

INDICATIONS:

For the vaccination of healthy cattle as an aid in the prevention of disease caused by bovine rhinotracheitis virus (IBR).

DIRECTIONS AND DOSAGE:

Rehydrate the desiccated vial with accompanying diluent and shake well. Inject 2 mL subcutaneously or intramuscularly using aseptic technique. Annual revaccination is recommended. Calves vaccinated before weaning should be revaccinated 30 days after weaning when the possible influence of maternal antibodies is decreased.

CAUTION:

Store at 35° to 46° F (2° to 8° C). **DO NOT FREEZE.**

Use entire contents when first opened. Allergic reactions may follow the use of vaccines; **ANTIDOTE:** Epinephrine. Do not vaccinate within 21 days before slaughter. Burn container and all unused contents.

**DO NOT USE IN PREGNANT COWS OR IN CALVES NURSING PREGNANT COWS.
ABORTIONS MAY RESULT.**

FOR USE IN ANIMALS ONLY
