

Consistent Elanco quality

And that means a lot. It means tested and traceable raw materials processed in certified, audited manufacturing facilities to assure purity. It means a formulation that mixes evenly and packaging that helps protect product potency. And it means proven results in every bag.

Proven formulation ensures product efficacy.

Stringent systems throughout manufacturing to monitor and assure safety and quality.

Tools and resources to support your business.

Directions for use: Broiler chickens

- Use at:
 - 110 g/ton in starter diets
 - 100 g/ton in grower diets

Directions for use: Turkeys

- Feed continuously to growing turkeys as the sole ration at 54 to 90 g of monesin per ton of complete feed.

CAUTION: Ingestion of monesin by horses and guinea fowl has been fatal.

The label contains complete use information, including cautions and warnings. Always read, understand and follow the label and use directions.

What do you get in every bag of Coban®?

Elanco quality serves you and your customers

Elanco Coban delivers proven product efficacy for consistent results in your birds

- Assured active ingredient levels in every batch deliver dependable results
- Reliable stability means the product we make is the product you receive
- Uniform particle size and consistent formulation for even distribution in feed
- Trusted and proven in research and commercial conditions since 1971

Elanco's quality systems reduce your risk and protect your brand

- Produced using Good Manufacturing Practices (GMP) that meet U.S. FDA and European Union requirements
- Ruminant Source Material (RSM) Free product eliminates risks associated with BSE contamination
- Approximately 15% of Elanco manufacturing personnel are dedicated to the Quality Team
- Third-party audits by U.S. FDA and EU agencies add further verification and customer trust in Elanco's quality processes
- Guaranteed traceability ensures peace of mind

Elanco supports your long-term business goals

- Technical support, sales support and complaint resolution make sure your questions and issues are addressed
- Regulatory, public and government affairs create market access and ensure that your business goals are achievable
- Pharmacovigilance and assay services ensure consistent quality

Elanco Coban quality is assured at every step

It's not easy to make Elanco Coban. We start with 17 raw materials that must go through a complex, sophisticated process, unique procedures and exact finishing steps to produce every bag. And because a breakdown at any stage could mean uncertain outcomes, each step is carefully controlled, regularly tested and documented for traceability to ensure consistent quality.

Fermentation		
	<p>Elanco Coban is a product of fermentation, beginning within a carefully controlled cell bank and grown in large, room-size fermentation tanks. Quality controls are monitored continuously. Each raw material batch is sampled, tested and approved prior to moving to the next stage of the process.</p>	<p>Assurances for our customers:</p> <p>Elanco Coban is free from foreign DNA.</p> <p>Elanco Coban includes no extraneous materials.</p> <p>Elanco Coban delivers guaranteed potency.</p>
Recovery and Granulation		
	<p>After fermentation, the material is processed and dried in a tightly controlled pellet mill to form consistent standard-size granules. Granule size and consistency determine how evenly a product mixes in feed.</p>	<p>Assurances for our customers:</p> <p>Elanco Coban has a high-quality, robust, granular formulation designed for even distribution in feeds.</p> <ul style="list-style-type: none"> • Free flowing • Particle size profile that works well in feed mixing • Not dusty
Finishing		
	<p>Elanco Coban moves from granulation storage silos through blending, mixing and bagging. Elanco Coban is bagged, palletized and shrink-wrapped for distribution.</p>	<p>Assurances for our customers:</p> <p>Elanco Coban's consistent packaging protects potency.</p> <p>Traceability is guaranteed with every bag of Elanco Coban.</p>
