**Type C Medicated Feed**

For the prevention of coccidiosis caused by *Eimeria tenella*, *E. necatrix*, *E. acervulina*, *E. maxima*, *E. brunetti*, and *E. mivati*.

**ACTIVE DRUG INGREDIENT**

Narasin.....27 – 45 g/ton  
Nicarbazin..... 27 – 45 g/ton

**GUARANTEED ANALYSIS**

To provide nutritional requirements.

**INGREDIENTS**

As listed in AAFCO Handbook.

**MIXING DIRECTIONS**

Feed continuously as the only ration.

**WARNING:** Withdraw 5 days before slaughter.

**CAUTION:** Nicarbazin medicated broilers may show reduced heat tolerance if exposed to high temperature and high humidity. Provide adequate drinking water and ventilation during these periods. Do not allow adult turkeys, horses or other equines access to formulations containing narasin. Ingestion of narasin by these species has been fatal. Do not feed to laying hens.
